Professionally Roofing For Over 50 Years!

Founded in 1964, the Ontario Industrial Roofing Contractors Association (OIRCA) is a professional group of roofing and sheet metal contractors, product suppliers / manufacturers and building science consultants / engineers.

The OIRCA and its members serve the construction industry through committees that specialize in roofing technology, industry occupational health and safety, apprenticeship, communications and education, labour relations and membership. This work is intended to not only enrich our member companies, but the industry as a whole.

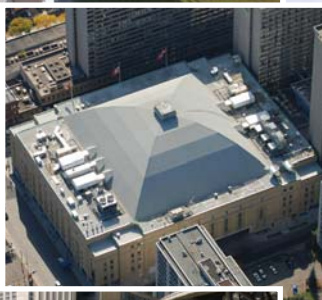

By specifying an OIRCA member, the purchaser of roofing services is assured of competent and competitive roofing practices. As a self-policing organization, the OIRCA stands behind the principles and ethics of the Association, and expects each member to do the same.

The OIRCA Vision...

The only source for professional ICI roofing contractors in Ontario.

The OIRCA Mission...

To assure through accountability, excellence in roofing construction.

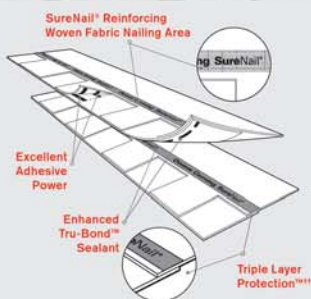

OIRCA

SureNail[®] Technology – A difference you can see and sell.

TruDefinition[®] DURATION[®]
SHINGLES with SureNail[®]
Technology.

Easy to sell. Easy to Install.

It's easy to see why TruDefinition[®] Duration[®] shingles are easy to sell. Not only do they have magnificent curb appeal, they have outstanding performance characteristics thanks to SureNail[®] Technology. These shingles have exceptional wind resistance that delivers a wind warranty of 209 km/hr* with only 4 nails. Plus, the highly visible woven engineered reinforcing fabric in the nailing line makes it easy for you to show homeowners why this shingle is different. And, more importantly, it makes it easy for your crews to install. Choose TruDefinition[®] Duration[®] Shingles from a recognized brand leader in the building industry for over 70 years, Owens Corning.

ROXUL'S VALUE-ADDED PARTNER AND TAPERED SPECIALIST SINCE 1998

Flat and tapered ProtecRSS-X2

We transform Roxul® high performance dual density stone wool into highly effective sloped roofing insulation systems.

Shiplapped or square edges

Because of its excellent dimensional stability, stone wool can be installed in a single layer. We shiplap the edges as an extra level of protection against thermal bridges.

Pre-cut crickets

Avoid the messy on-site cutting of crickets while using the best material available to the roofing market today.

Pre-cut sumps

An insulation that does not retain, but disperses moisture is the perfect substrate for your membrane, especially in high moisture areas such as drains.

CantRSS

This stone wool cant will always perfectly support the membrane with a 45° transition at details and won't deteriorate, even if somehow exposed to water.

Metal deck / metal roof flute filler

Made-to-measure metal deck and metal roof flute fillers.

ModulRTs tapered specialties

Why Advertise?

Ontario Roofing News is the official publication of the Ontario Industrial Roofing Contractors Association (OIRCA). The publication is a marketing tool designed to promote the members of OIRCA to key buyers of construction products and services in the province of Ontario.

Ontario Roofing News provides news and views about current developments within the roofing industry, interesting roofing projects, recommended roof care procedures, general advice and information relative to roofing, as well as current industry trends. The content is displayed in such a way to offer busy construction professionals an opportunity to glean relevant information in a quick, concise fashion.

Ontario Roofing News is a staple publication within numerous architectural and engineering firms, and its topical information is referenced on multiple occasions.

IT'S YOUR MESSAGE.
GIVE IT THE EDGE.
